

Mail Logistics for Professionals

HSW

PAPER OUTPUT MANAGEMENT

open to everything.

HSW already offers tailor-made
solutions for these countries:

Germany
Great Britain
France
Sweden
Norway
Belgium
Austria
Finland
Denmark
Australia
Japan
Portugal
Poland
Serbia-Montenegro

You can increase your mail output efficiently and cost-effectively with an HSW mail box system, which fills your postbox automatically. You can greatly improve the effective performance of your inserter. The HSW system monitors your mailings and transfers them to the national postal services optimised for postage – automatically packed in mail boxes, ready-labelled for delivery to the distribution centres.

individual.

Efficient and innovative

Millions of letters go through an HSW system every day. In banks, insurance companies, public authorities, telecommunications companies and letter-shops. Wherever high volumes of mail require cost control, efficiency and innovative technology, we are on the spot with solutions which you can no longer do without in rational mailing processes.

PBS

Post-Box-System

Automated packing of mail into mail boxes and post-optimised labelling alongside high-speed inserting.

MPC

Mail-Piece-Control

Camera supported job/document tracking system.

Adaptable and well thought out

Realigning yourself to the wishes and requirements of each customer requires the readiness to understand the definition of a project very clearly. One of our principles is to think outside the box and not to see our product as a single element, but rather as a part of the whole paper output process.

Modular and capable

Therefore, the smooth integration and communication of our products with other existing equipment or superior process software in your »mail factory« has top priority. Every HSW system can therefore be docked to any well established high performance inserter. Should the requirements increase, then your HSW product increases its capacity too, thanks to the simple modular design. Straightforward extensibility and high adaptability as well as compact dimensions give you maximum investment security.

Individual and versatile

With many years of industry knowledge and experience of more than 150 HSW systems installed in 14 countries, we have a custom-tailored solution to your needs: from simple to complex, as flexible as you like, and just as solid and robust as you would expect from »Made in Germany« engineering.

Precise and dynamic workflows ensure you maintain good working speeds so that you get the full potential from your high speed inserter.

versatile.

The simple and visual menu helps with the setup and operation of the system in a user-friendly manner. In this way, your operator gets optimal support.

With our data controlled, to-the-letter **precise separation** of your documents, you will effortlessly meet the requirements of your postal service at all times.

Thanks to adaptable mail
box handling, our systems are
compatible with all existing boxes.

efficient.

Our innovative box labelling system
enables efficient and automatic processing
of a large variety of mail box types.
